A great game seeing as though it was made by one person. That's crazy! This game is super fun! Reminds me of Goldeneye. I can see the potential this game can have down the road with future updates. I can't wait to see how the game evolves and am excited for when online is implemented. P.S. Shooting the UFO is fun too, btw.. - Controls are buggy (can't stop moving even when I'm not touching the controller).

- Ability to shoot breaks seemingly randomly (seems to happen when it tries and fails to do a bullet cutscene?).
- Even just setting up your controls is a chore (it's done outside the game itself).

This was all with a 1st party xboxone controller. I even tried it with a different controller just to make sure the controller itself wasn't broken.

- Military Guns set (auto, pistol, rifle)
